Education

Washington State University, Voiland College of Engineering and Architecture Aug 2025 - Dec 2027
Bachelor of Science in Computer Science — Minor in Mathematics, Pullman, WA

Green River College Sept 2023 - June 2025
Associate of Science in Computer Science, GPA: 3.93/4.0 Auburn, WA

Technical Skills

Languages: Python, Java, JavaScript, TypeScript, SQL, HTML/CSS

AI & Automation: Generative AI, OpenAI API, AWS Bedrock, LLM Agents, Prompt Engineering, Workflow Automation

Cloud & Platforms: AWS (Bedrock, S3, Lambda), Firebase, Vercel, Render

Developer Tools: Git, GitHub, GitHub Actions, Docker, Bash, MLflow, MySQL, Tableau

Libraries/Frameworks: FastAPI, Flask, React, Next.js, PyTorch, Pandas, LangChain

Work Experience

CodingWithKids Jul 2024 - Present
Coding Instructor Seattle, WA & Remote

- Delivered 3 programming courses (8 - 16 students each), creating structured **technical documentation** and reproducible walkthroughs to support **learning** and facilitate **team collaboration**.
- Provided step-by-step guidance to students, strengthening **problem-solving** and **analytical thinking** in Python and Scratch programming projects.

Headstarter Jul 2024 - Sep 2024
Software Engineering Resident Remote

- Built and deployed 5 **AI-powered automation products**, leveraging OpenAI models and **LLM agents** to **automate repetitive tasks**, **summarize content**, and **optimize workflows**.
- Engineered **LLM-based agents** for **data transformation**, **content summarization**, and **multi-step task automation**, enabling scalable **AI-driven processes**.
- Implemented **analytics instrumentation** and **automated reporting pipelines** to improve visibility into **product performance** and streamline **team workflows**.
- Documented **AI workflows**, **design decisions**, and implementation strategies for **reproducibility** and **team knowledge sharing**.

Mathnasium Aug 2023 - Jun 2025
Math Tutor Kent, WA

- Provided step-by-step analytical explanations to 20+ students, strengthening **communication**, **problem-solving**, **precision**, and **structured reasoning**.

Projects

TutorFlow – Intelligent AI Tutoring System Tech Stack: Python, AWS Bedrock, Lambda, DynamoDB, React/TypeScript

- Built a **serverless AI tutoring platform** using AWS Lambda, API Gateway, DynamoDB, and Bedrock (Claude 3.5) to **automate step analysis**, **detect misconceptions**, and **generate adaptive hints**, enabling scalable, **guided learning** without direct-answer solutions.
- Designed end-to-end architecture with React/TypeScript frontend and Python-based AI backend, implementing **secure**, **low-latency workflows**, **dynamic difficulty scaling**, **personalized practice generation**, and **session tracking** for continuous analytics.
- Documented **AI workflows**, **reasoning chains**, and **automation pipelines** to ensure **clarity**, **reproducibility**, and **team collaboration**.

Xbox Player Behavior Analysis Dashboard Tech Stack: Python, Tableau, Pandas, SQL

- Built **automated ETL pipeline** and interactive Tableau dashboard to **analyze player retention**, **session patterns**, **revenue trends**, and **regional metrics**, identifying insights such as a 40% drop-off at critical engagement points.
- Streamlined **workflow** for data collection, transformation, and visualization, reducing **manual reporting** and improving **decision-making** for **gaming analytics**.
